**Attachments:** Nigel Bruce\_14 March 2014\_Final.pdf [3139 KB]; BioLite test report DRAFT Rev3.docx [788 KB]

Sheila,

Following are items for the agenda:

U.S. TAG (Technical Advisory Group) activities following Plenary Meeting of ISO TC (Technical Committee) 285, Clean Cookstoves and Clean Cooking Solutions (John Mitchell can provide an update, if available).

Does Carlos want to give an update on the ACE (Air, Climate, and Energy) program review of the cookstove task?

Nigel Bruce, University of Liverpool & WHO, visited at RTI International on March 14, 2014 and gave an excellent presentation on new WHO Guidelines and reducing household air pollution. FYI, presentation attached.

Jill Baumgartner, McGill University, Toronto, visited on March 21, 2014. We are collaborating with Jill on a STAR grant through a Cooperative Agreement. Jim and Erika can provide a summary.

T. Pradeep, Indian Institute of Technology, visited on April 4, 2014. Erika may provide a summary.

We are submitting a cookstove report for EPA review (FYI, draft attached). After this report is cleared for publication, we will use it as a template for approximately 20 more reports.

Will you confirm that Carlos will lead the meeting tomorrow?

Thank you.

Jim
